

BRIDGE JAM

One-Way Order for Potomac Park Structure Being Considered.

Establishment of a one-way rule for traffic over the small bridge at the tidal basin inlet is being considered by Col. Clarence O. Sherrill, in charge of public buildings and grounds, as one means of relieving congestion such as occurred in Potomac Park Sunday afternoon.

Attracted by the blooming of the Japanese cherry blossoms and the warm weather, thousands of motorists drove to the park Sunday, with the result that a jam occurred on the approach to the bridge.

Col. Sherrill himself motored to the Speedway and saw linemen and flippers closed four abreast along the river side of the polo field.

South-Bound Use Only. The colored said today such occurrence might be avoided in future if the small bridge in question were closed to south-bound traffic only. He has become convinced, he said, that this bridge is inadequate for the present flood of machines that attempt to cross it on Sundays and

Records at the District building show that in the last year, during this fiscal year, 4,118 automobiles have been issued, as compared with only 53,136 for the corresponding year of the last year.

These figures do not represent the actual number of machines that have been issued, but rather the number of new tags for a new tag each year, calling for a new tag each year.

With the open seasons of the year at hand, this increase in motor traffic is bound to be felt on the drives of Potomac Park during the next five months.

Another Congested Point. The intersection of 16th U street and New Hampshire avenue is another spot where District officials are seeking to improve traffic conditions.

At present temporary wooden platforms are in the street there, to guide machines on the endless procession of automobiles on 16th street.

It is understood that officials are seeking to have the concrete platforms in the street there, to guide machines on the endless procession of automobiles on 16th street.

The establishment of a circle there, with the U street cars passing through it, also has been recommended to the Commissioners.

Although some motorists have expressed dissatisfaction with the platform idea, engineer department officials say they have had a large number of commendatory messages.

CONNECTICUT AVENUE

PAVING SEEN VITAL

(Continued from First Page.)

should at least provide for as much of the results of this thoroughfare with that part of the east side which is paved.

The avenue bears extremely heavy traffic. It is a thoroughfare to and from the fast-growing section added to the city by the addition of the new section.

It is used by people going to and from points in Maryland. Practically all of the traffic on the avenue is used by people going to and from points in Maryland.

Widening of the west side of the avenue is one of the great needs in connection with the resurfacing. It was pointed out, as the space between the car tracks and deep gutter is not wide enough to handle the large volume of traffic which the street has to carry.

District Commissioners, in their estimates, asked for an appropriation of \$35,500 to widen and resurface the avenue, but the House refused to appropriate the money.

However, the Senate inserted an amendment providing for an appropriation of \$10,000 to widen and resurface the avenue, and the House agreed to the amendment.

Under the treaty our relations with England and Japan is 5-5-5. The English navy this year will have 104,000 tons of tonnage, and the Japanese navy will have 107,000 tons.

This bill therefore has established a naval parity between the United States on the small end. The guns are of no account unless we have the men behind them. The men behind the guns are the navy.

The minimum number of men necessary to man our Navy at present with a reasonable degree of efficiency is 95,000. If we had all those we need for every contingency we should require approximately 100,000 men.

The battleship is the keystone of the Navy arm. On the battleship the naval tradition is kept alive. It is the symbol of the Navy's power.

Under the treaty our relations with England and Japan is 5-5-5. The English navy this year will have 104,000 tons of tonnage, and the Japanese navy will have 107,000 tons.

Easter 10-Day Holiday

For School Children Will Start Friday

The annual ten-day Easter holiday for the District public school children will begin at the close of school Thursday. It was announced today by Supp. Frank R. Allen.

Many of the schools are planning special Easter exercises. The program will vary in principle of music and plays.

CHIEF JUSTICE REVOKES

TRACTENBERG'S PAROLE

Man Who Is Under Indictment in Several Cases Must Serve Time on Joyriding Charge.

Aaron Tractenberg, twenty-three years old, reputed by the police to have been implicated in numerous instances of transporting whisky from other places into this city for bootleg supply purposes, appeared before Chief Justice McCoy this morning on an allegation that he had violated the terms of his parole.

Tractenberg, charged with joyriding, was brought before the court by Attorney Robert L. Miller, who appeared in court and asked for a stay of two years on the charge.

Probation Officer Steele reported that Tractenberg had failed to comply with the requirements of his parole, and the justice revoked the parole, which means that Tractenberg will have to serve two years in prison.

The two years may not be all. The young man is under indictment for the last time in connection with a automobile belonging to Frank D. Burrows, a dealer in Center market, it being alleged that he had stolen the car in Petersburg, Va., for \$500.

Another indictment against him charges that he had stolen a car in Petersburg, Va., for \$500. The police also allege that he was a party to the exciting liquor pursuit on January 1, when the police looked at so-called "hot" cars at 6th and M streets and seized 500 gallons of corn whisky.

Tractenberg said the whisky was brought from forty miles below Petersburg, Va. Shooting done on that occasion, he declared, was by the police and not by members of the automobile party. A rifle carried in the car was used by the police.

It is said by the police that the young man also is wanted elsewhere.

U. S. JEOPARDIZED

IN CUTTING NAVY, SAYS MR. HUGHES

(Continued from First Page.)

prove, I believe, an expensive experiment. I believe that the Navy should be maintained at a level which will insure the safety of the United States.

It is a fact that the Navy is being cut, and that the result will be a weakening of the United States. The Navy is the backbone of the United States, and it must be maintained at a level which will insure the safety of the United States.

BORSE AND BANK

IN AGENS CLOSED

Closing of the bourse and the National Bank of Greece was reported today in cable dispatches to the Commerce Department.

Confusion caused by the uncertainty of the enactment of a forced loan by the Greek government, according to Commercial Attaché Paul L. Edwards at Athens, caused the Greek authorities to close the bourse on April 6, and the National Bank of Greece April 8, the day after the forced loan became effective. Business in Athens is at a standstill, he added.

Consul General Will L. Lowrie, at Athens, reported that a forced international loan of 1,000,000 drachmas was floated by the Greek government by calling in part of the paper money in circulation in exchange for 8 1/2 per cent bonds, due in twenty years, and certain other considerations.

Bank notes of 5, 10, 25, 100, 500 and 1,000 drachmas, Consul Lowrie explained, are to be cut in half, the half value of the whole note, and the other half of the note bearing the crown to be held by the government and to be replaced by bonds.

The sharp tilt in the market was reported by the Greek government, according to Commercial Attaché Paul L. Edwards at Athens, caused the Greek authorities to close the bourse on April 6, and the National Bank of Greece April 8, the day after the forced loan became effective. Business in Athens is at a standstill, he added.

BRYSON'S OTHER FOREST FIRE PATH

WEEPS IN HIS CELL

Special Dispatch to The Star. HUNTINGDON, Pa., April 11.—Two mothers have met here in the shadow of that inexorable higher law which shatters the human triangle wherever its unstable links may be welded together.

One, desperate over the death of her murdered daughter, is fighting bravely to save the dead girl from the charge of bigamy, or a second wedded life without benefit of clergy. The other weeps with broken heart over the tragedy which has brought her beloved son to a secluded cell in "murder" row of the county jail.

The fire started about three miles from Huntingdon, near Harman's bridge, on the road from Huntingdon to Wolfville, about 2 o'clock Monday morning. The origin is not known, but some think that it was started by a careless smoker.

With plenty of dead leaves and grass, the fire spread quickly, and in a short time the path was more than a mile wide and headed directly toward Huntingdon, a town of about 1,000 people. The fire reached the town of Huntingdon late last night.

This morning the flames were under control, but the damage to the buildings, which had been threatened, was considerable. Hundreds of residents fought the flames.
